

SURAJ KESHARWANI

.NET Full-Stack Developer

+91-9794930740 | +91-6386580826 | surajkesharwani9918@gmail.com | Pratapgarh (UP), India | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

.NET Full-Stack Developer who owns features end to end — from SQL Server schema and C# / ASP.NET Core services, through React interfaces, to IIS deployment and production support. Experienced in RESTful Web APIs, SSIS ETL workflows, CI/CD pipelines, and diagnosing live issues independently across hosted environments. Regular user of AI-assisted and agentic development tools (Claude Code, GitHub Copilot) to accelerate delivery and improve code quality. Works directly with clients in Agile/Scrum teams, turning requirements into delivered software.

EXPERIENCE

.NET Full-Stack Developer — Scanditech Solution Pvt Ltd

01/2024 – Present

- Own end-to-end delivery of features across an ASP.NET MVC and .NET Core product line in C#, .NET Framework, and SQL Server, following OOP design patterns and n-tier architecture.
- Own deployment and hosting on IIS across VM-hosted servers — creating sites, configuring application pools and bindings, and publishing builds from Visual Studio and MSBuild.
- Manage environment configuration through web.config — connection strings, appSettings, transforms, and URL rewrite rules — and configure HTTPS certificates with Windows and anonymous authentication across development, staging, and production.
- Resolve production incidents independently, diagnosing 500/502 responses, application pool crashes, and file-permission failures from IIS logs and event traces with minimal escalation.
- Own client requirements end to end — gathering them directly from stakeholders, translating them into technical solutions, and delivering within committed timelines.
- Design and build RESTful Web APIs connecting the React frontend to backend services, including a reusable currency conversion module from a third-party REST API now consumed across multiple applications.
- Implement authentication and authorization using ASP.NET Identity and JWT tokens.
- Optimize database queries, stored procedures, triggers, and indexing, improving system performance by 30%.
- Automate recurring operations — daily agreement period updates and archive linking/delinking through SQL Agent Jobs, SSIS ETL workflows for cross-system data integration, and Windows Services for background processing.
- Query and manipulate data using LINQ and Entity Framework alongside stored procedures for complex operations.
- Build responsive UI components using React, JavaScript, TypeScript, jQuery, HTML, CSS, AJAX, and Bootstrap.
- Establish and maintain CI/CD pipelines using GitHub Actions for automated build, test, and deployment workflows.
- Drive AI-assisted engineering with Claude Code and agentic workflows for multi-file refactors, debugging, documentation, and test coverage, with AI-assisted code review on diffs; build against the Claude API and use GitHub Copilot for inline completion.
- Work in an Agile/Scrum team using Git/GitHub with feature branching, pull requests, and peer code review.

PROJECTS

System Organizer

C#, .NET MVC, SQL Server, JavaScript, jQuery, HTML, CSS, IIS

- Contributed to a trilingual (English/Swedish/French) web application for property management and construction project coordination, including role-based access control.
- Built document management, scheduling, task assignment (To-Do), and a Q&A module; integrated a third-party Gantt chart tool.
- Implemented Windows Services for alert emails and background status/data updates.

Company Organizer

C#, .NET Core Web API, Entity Framework Core, SQL Server, JavaScript, React

- Implemented JWT-based authentication in .NET Core Web API for secure, stateless, scalable login and registration.
- Designed a modular, n-tier architecture supporting scalable integration with React on the frontend.

E-Commerce Web Application

C#, .NET Framework, ASP.NET MVC, SQL Server, React

- Built admin and client functionality including product/category/order management, authentication, cart, and payment integration.
- Optimized backend API calls and database queries, improving communication effectiveness by 40%.

Automatic Entry Vehicle Authentication System

Python, Tkinter, Machine Learning (CNN, Haar Cascade)

- Built a real-time vehicle recognition system using Haar Cascade for plate detection and CNN for character extraction, achieving 96% accuracy.

SKILLS

Languages: C#, SQL, JavaScript, TypeScript, XML

Frameworks: .NET Core, .NET Framework, ASP.NET MVC, ASP.NET Core, ADO.NET, Entity Framework, LINQ

Frontend: React, HTML, CSS, AJAX, JSON, Bootstrap, Tailwind CSS, jQuery

Data / ETL: SQL Server, SSIS

Architecture & Practices: OOP Design Patterns, N-Tier Architecture, Agile/Scrum, Code Reviews, Debugging & Performance Profiling

DevOps & Tools: Git, GitHub, GitHub Actions (CI/CD), Visual Studio, VS Code, Postman, Swagger

Servers & Deployment: IIS (sites, application pools, bindings), web.config, SSL/TLS certificates, Windows Server, VM-hosted deployment

AI-Assisted Development: Claude Code, Claude agents & agentic workflows, Claude API, AI-assisted code review, GitHub Copilot

Other: REST APIs, Windows Services, JWT Authentication, SQL Agent Jobs

TRAINING / COURSES

.NET Full-Stack Developer — Ducat India

Complete front-end and back-end training on the Microsoft stack: C#, .NET Core, ASP.NET MVC, SQL Server, Entity Framework, LINQ, Web API, HTML5, CSS3, JavaScript, Bootstrap, and React, including real-time projects and deployment.

EDUCATION

B.Tech, Electronics & Communication Engineering — Rajkiya Engineering College, Kannauj 08/2019 – 06/2023

Intermediate & High School — Janta Intermediate College, Mauaima, Prayagraj

KEY ACHIEVEMENTS

- Performance Optimization: Improved system performance by 30% through optimized SQL queries and indexing.
- API Communication: Developed RESTful APIs that improved communication effectiveness by 40%.
- Vehicle Authentication: Achieved 96% accuracy in a CNN-based vehicle authentication system.

ADDITIONAL INFORMATION

Languages: Hindi (Proficient), English (Proficient) | Strengths: Quick learner, self-motivated, strong analytical & problem-solving skills | Interests: Exploring new technologies, outdoor sports, travel
